Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Appropriate Extinguishing Media

Use water spray, dry chemical, alcohol-resistant foam, or carbon dioxide.

5.2. Special hazards arising from the substance or mixture

Concentrated Vapours are heavier than air. In case of high temperatures, potentially explosive mixtures may develop upon contact with air. Carbon oxides may form.

5.3. Advice for fire-fighters

Special protective equipment for fire fighters:

Use standard procedures for chemical fire. As in any fire, wear self-contained breathing apparatus, MSHA/NIOSH approved (or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation and avoid breathing vapours, gas or mist. Vapours can accumulate in low areas. Contain spillage if safe to do so. For personal protection see section 8.

6.2. Environmental precautions

Prevent further leakage or spillage if safe to do so. Prevent entrance into sewers and ground water.

6.3. Methods and material for containment and cleaning up

Contain spillage with non-combustible absorbent material (e.g. sand, earth, diatomite, acid binder, vermiculite, sawdust) and place in container for disposal according to local/national regulations. Alternatively, an electrically protected wet/dry vacuum cleaner can be used to collect spillage and material to container for adequate disposal. Store in adequate, closed container.

6.4. Reference to other sections

For disposal see section 13

7. HANDLING AND STORAGE

7.1. Precautions for safe handling

Close packaging after use. Avoid skin, eye contact and ingestion. Wear appropriate personal protection. Avoid high temperatures and sources of ignition – No Smoking. Avoid oxidants and acids. Maintain adequate local and general ventilation where the product is used.

7.2. Conditions for safe storage, including any incompatibilities

Store in cool dry area. Keep container tightly closed in a well-ventilated area. Protect from light. Reproduce labelling if damaged or transferred to another container. Keep upright to prevent leakage.

Temperature: Ideally maintain storage temperature at 2-5°C.

7.3. Specific end use(s)

See section 1.3. No other specific used.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Control parameters

Occupational exposure limits 10 mg/m³, on the basis of Workplace Exposure Standards for Airborne Contaminants. Australia.

8.2. Exposure controls

General protective and hygienic measures:

Avoid skin and eye contact. Keep away from foodstuffs and beverages. Handle in accordance with good industrial hygiene and safety practice.

Engineering Measures:

Ensure adequate ventilation, especially in confined areas.

Environmental Exposure Controls:

The product should not be allowed to enter drains, water courses or the soil.

Eye/face Protection: Safety glasses with side-shields conforming to appropriate government standards.

Hand Protection: Handle with gloves (latex or nitrile). Inspect gloves before handling material. Remove carefully so as to avoid contaminating skin.

Skin and body protection: Wear suitable protective clothing where the type will depend on the possible contaminant concentrations.

Respiratory protection: Where risk assessment suggests respirator is needed due to poor engineering measures, use a full face respirator of appropriate local quality.
