

## HAND SANITISER

### PRODUCT INFORMATION

Hand hygiene has never been more important than it is right now – but it doesn't have to be a clinical or unpleasant experience.

As lockdown is easing, and with new government-issued hygiene practices in place, EOT has developed a range of 100% natural yet incredibly effective Tasmanian made hand sanitisers that combine the antimicrobial and antiviral properties of natural alcohol and essential oils. Our aromatic formulas dry quickly and are soft on the skin.

Independently tested to kill 99.99% of germs, each formula follows the WHO guidelines using 80% v/v alcohol and is carefully infused with Tasmanian grown and produced essential oils renowned for their therapeutic and natural antibacterial qualities including **Tasmanian Lavender Oil, Southern Rosalina Oil, Tasmanian Native Pepper Extract and Tasmanian Peppermint Oil.**

EOT has the capability to produce up to 20,000 litres of hand sanitiser per day. All of our products are produced in Tasmania under our company's strict ISO9001:2015 Quality System.

Our high-quality, naturally hygienic hand sanitisers will help you meet the Minimum Workplace Standards to ensure confidence and safety as we adjust to the new normal. Please contact us [sanitiser@eotasmania.com.au](mailto:sanitiser@eotasmania.com.au) to discuss your specific requirements or see us on the web at [www.eotasmania.com.au/handsanitisers](http://www.eotasmania.com.au/handsanitisers).

1 litre @ \$24.95

5 litres @ \$21.95/l (\$109.75/unit)

**FREIGHT:** In Tasmania, we offer a flat shipping fee of \$10.00. For orders over \$180 shipping is on us!

For orders outside of Tasmania, contact us and we can discuss freight rate options.

## HAND SANITISER

### PRODUCT INFORMATION

Our hand sanitiser formulations are not only efficient in their antibacterial action but contain 100% natural ingredients and pure essential oils to make them more pleasant on the nose and hence more enjoyable to use.

- ✓ **Natural ethanol** | An alcohol obtained and manufactured from natural sources. We use 80% v/v ethanol in our hand sanitisers, the amount required to meet the World Health Organisation (WHO) guidelines. Through a process called denaturation, alcohol has the remarkable ability to deactivate the proteins in viruses and bacteria. When applied, it effectively ruptures cell walls so viruses and bacteria cease to function normally and thus perish.
- ✓ **Glycerine** | A gentle, natural moisturiser commonly used in skincare products. By its nature, glycerine is a powerful humectant which is easily absorbed by the skin, hydrating it and sealing in moisture.

Our formulas include at least one of the following **Tasmanian grown and produced** essential oils, all of which are renowned for their therapeutic and natural antibacterial qualities.

- ✓ **Tasmanian Lavender (*Lavandula angustifolia*) Oil** | The aromatherapeutic benefits of Lavender oil are known to include relief of stress and anxiety. Straight from our property in Margate, Tasmania. Our perfumery-grade lavender oil is among the best in the world, leaving your hands smelling of the freshly cut flowers,
- ✓ **Southern Rosalina (*Melaleuca ericifolia*) Oil** | Also known as Lavender-Tea Tree and sourced from Tasmania's pristine Flinders Island, this oil offers both a mild lavender aroma and high cineole content. Cineole is the natural antibacterial found in eucalyptus oils, proven to have antiviral activity.
- ✓ **Tasmanian Native Pepper (*Tasmannia lanceolata*) Extract** | Locally known as Mountain Pepper, this plant is a proven potent antimicrobial, making it an obvious inclusion in our hand sanitisers. Independent laboratory testing of our Tasmanian Native Pepper Extract has shown that it is highly effective against a wide range of bacteria, yeasts and moulds at only a few parts per million. In other words, it's bacteria's natural enemy!
- ✓ **Tasmanian Peppermint (*Mentha piperita*) Oil** | Our Peppermint oil, derived from an original Black Mitcham cultivar, is a highly-regarded essential oil worldwide. Being a familiar strong antibacterial and soothing agent, Peppermint oil adds an uplifting freshness to our hand sanitiser.

### USE DETAILS

**How to Use** | Apply to hands, wait 30 seconds to dry.

**Safety Warning** | For external use only. Do not swallow. Avoid eyes. Keep out of reach of children. If irritation occurs, wash affected area and discontinue use. Do not use on inflamed, broken or sensitive skin. Flammable.
